Swedish Brand and Designed Unisex Windbreaker Camping & Outdoor Jackets & Pants

Fabric information

Water repellent with DWR treatment

To make a fabric resistant to moisture, you can make it water-repellent by using a so-called DWR treatment on the outside of the fabric (Durable Water-repellant finish), which is an impregnation. There are different types of DWR treatments, we use one without the toxic chemical fluorocarbon 1 pfas // pfos.

It is the DWR treatment I impregnation that causes the water to form small drops on the outside of the fabric that "Roll off".

DWR treatment is used during many washes but can be improved during washing treatment or sprayed on. This type of treatment does not impede breathability, it only affects the surface tension of water.

OEKO-TEX certified

Our fabric production is Oeko-Tex certified to protect the environment and the user's health. The fabrics and all the details have been tested for harmful substances; the article is therefore harmless in human ecological terms.

Fabric in Rib-Stop

Rib-stop is a way of weaving a fabric so that tears that may occur are not torn up further. It looks like a small net of reinforcing threads. This enables a durable but lightweight fabric.

Stretch

To get a stretchable property in the fabric, it consists partly of 2% elastane, which contributes to good movement in the garments and increases comfort.

Features Breathe Jacket

- The jacket has an integrated hood in the collar hidden inside a zipper. Adjustable in two positions for the best fit. The higher collar also provides good protection against chafing in the neck when wearing a gasket together with carrying straps e.g., Binoculars, etc. that you want to hang in front of your chest for easy access.
- The jacket has a ventilation opening between the shoulders and her body heat is built up during high activity, and mesh lining is placed between sewing to transport out the heat that is created.
- The jacket is extended at the back for an improved fit. • The jacket is adjustable at the waist.
- The jacket is adjustable in the wrists.
- The jacket has a thin mesh inner fabric to increase comfort but maintain that the garment dries quickly.
- The jacket has 8 pockets:
 - Two pockets placed on the sleeves are opened and closed with Velcro, divided into two smaller compartments, perfect for storing a smaller knife, compass, radio, etc.
 - Two pockets on the chest are opened and closed with a zipper.
 - A mobile phone pocket on the inside of the jacket is opened and closed with Velcro.
 - A large pocket on the belly/chest for a map and compass etc., hidden inside overlapping fabric (windbreaker) that closes the jacket. Opens and closes with a zipper. -Two pockets just above the waist are opened and closed with a zipper.
- The windscreen that covers the main zipper is closed with buttons, which allows the user to ventilate when the zipper is not in use.

Other product specifications:

Number pockets 8

Ventilation: Yes

Washing: 30 • C normal process Dry cleaning may not be dry cleaned

Bleaching: may not bleach Drying may not

Tumble Iron: recommended (low heat)

Other care instructions do not use softener,

fluorocarbon impregnation after washing, wash with similar colors.

BREATHE TROUSERS has several different functions that are suitable for an active outdoor life. The high proportion of cotton makes the trousers breathable; the material is flexible and comfortable. Stylish and functional details that are suitable for several different outdoor activities. Water-repellent with DWR treatment, OEKO-TEX certified, Rib-Stop, Stretch.

Features Breathe Trousers

- The trousers have strong and extra many belt loops together with elastic at the waist to keep the trousers in place. The elastic in the waist also enables variation in waist measurements without deteriorating fit.
- The trousers have deep thigh pockets to enable mobility when bending with objects in the pockets.
- The trousers have thigh pockets placed on the sides for storage of larger material that extends from the body a few centimeters to minimize friction and chafing.
- The trousers have knee pockets equipped with knee pads that can be easily removed or put back on depending on need.
- The trousers are equipped with Velcro I Velcro straps at the calves. with these straps, you can reduce the friction around the waist when you walk longer distances, they have a relieving function.
- The trousers can be opened along the calf with a zipper to enable easy sock changes. This also allows you to take off and on the pants with most boots on.

- The trousers are adjustable in the leg ends to be able to adapt to different types of boots and also large boots.
- The trousers are fastened with a fabric strap around the shoelaces to create a lock so that in terrain/snow they do not slide up over the boots.
- The trousers also have two deep pockets at the back.
- The trousers have no inner fabric and dry extremely quickly.

Other product specifications:

Waist: Normal waist

Fit: Normal fit

Trousers length: Full-length

Trousers Leg closure: Fixed length, Adjustable leg ends
